**MARELA® 7**

# MARELA® - Serie

**MARELA® 10**

**MARELA® 30**

The **MARELA®** series with Blue Efficiency® burners is an excellent solution for shipowners who require a comfortable climate, maximum convenience, and luxury on board their vessels.

With the **MARELA®** series, soot emissions are reduced to zero, meaning the onboard air quality is not affected. If e-fuels are available on board, you can immediately run the **MARELA®** series on them.

The boilers in the **MARELA®** series have low exhaust gas temperatures, resulting in high efficiency. This means the generated heat is utilized optimally rather than lost through the exhaust system. Two-stage operation further increases efficiency.

The heating system features intelligent control technology that can deliver the system's full heating output when a large amount of hot water is needed quickly for showers. This ensures maximum

comfort on board. The system also offers freeze protection, even when no one is on board.

The **MARELA®** series provides various options for domestic hot water production—either via a plate heat exchanger in a combi configuration or via a domestic water connection to an external storage tank.

The scope of delivery for the **MARELA®** series includes essential components such as the control panel, circulation pump, and oil filter. Overall, the **MARELA®** series is an outstanding choice for shipowners who value environmental friendliness, efficiency, and onboard comfort. The combination of low-emission combustion, rapid hot water supply, and freeze protection makes this heating system ideal for maritime applications. It is the most compact solution on the market featuring blue-burner technology.

### Experience the new SCHEER HeatMate® controller.

Enjoy the wide range of connectivity options (CAN and Modbus), the convenience of operating your heating system from your saloon, and the extensive features available to you – such as the new Night Mode.

## KABOLA KB EcoLine

The KABOLA KB series is tailored for use on board ships. The KB series is a compact oil-fired heating system with blue-flame burner technology, enabling installation in confined spaces. Domestic hot water can be produced either via a plate heat exchanger in a combi configuration or via a domestic hot water connection to an external cylinder.

Thanks to complete fuel combustion at around 1,450°C, blue-flame burner technology achieves a maximum reduction in emissions (soot number down to the detection limit). Certified by TÜV, the KABOLA KB series is an excellent choice when optimal environmental performance and minimal space requirements are essential.

## KABOLA HR series

The HR series is a compact heater for marine applications and is equipped with a yellow-flame burner. Domestic hot water can be produced either via a plate heat exchanger in a combi configuration or via a domestic hot water connection to an external cylinder.

Designation	Item No.	Output	Price (incl. VAT)
HR 300 boiler complete with yellow-flame burner, 230 V	078000	8 - 10 kW	5.558,91 €
HR 300 combi boiler, complete with yellow-flame burner, 230 V, incl. plate heat exchanger	0780001	12 - 14 kW	8.418,67 €
HR 300 boiler complete with yellow-flame burner, 230 V, incl. storage connection	078001	8 - 10 kW	6.842,25 €
HR 400 boiler complete with yellow-flame burner, 230 V	078002	12 - 14 kW	5.795,31 €
HR 400 combi boiler, complete with yellow-flame burner, 230 V, incl. plate heat exchanger	078003	12 - 14 kW	8.159,36 €
HR 400 boiler complete with yellow-flame burner, 230 V, incl. storage connection	078004	12 - 14 kW	7.146,20 €
HR 500 boiler complete with yellow-flame burner, 230 V	078006	15 - 20 kW	6.173,56 €
HR 500 combi boiler, complete with yellow-flame burner, 230 V, incl. plate heat exchanger	078007	15 - 20 kW	8.605,16 €
HR 500 boiler complete with yellow-flame burner, 230 V, incl. storage connection	078008	15 - 20 kW	7.591,99 €

### Scope of delivery:

- Yellow-flame burner
- Control panel
- Circulation pump
- Fuel filter
- Room thermostat (basic version without Wi-Fi)

### Heaters with storage connection additionally include:

- Changeover valve
- Control thermostat for domestic hot water

## BlauthermDUO

Conversion kit for the HR series to the advanced, soot-free Blue Efficiency® by SCHEER.

Designation	Item No.	Price (incl. VAT)
Blautherm DUO BE HR 300	015087	3.174,19 €
Blautherm DUO BE HR 400	015088	3.174,19 €
Blautherm DUO BE HR 500	015089	3.174,19 €

## KABOLA compact 7

The KABOLA compact 7 is a small, diesel-fired boiler with yellow-flame burner technology. The compact 7 is available as a boiler and—when equipped with a boiler controller—also as a combi boiler. Thanks to its small installation dimensions and quiet, fully automatic operation, this boiler is well suited for (small) sailing and motorboats.

Continuous heating and even domestic hot water are possible. Ideal for central heating with radiators and/or combined with warm-air heating. An extremely efficient, quiet, and powerful system.

### Scope of delivery:

- Yellow-flame burner
- Control panel
- Circulation pump
- Fuel filter
- Room thermostat (basic version without Wi-Fi)

### Heaters with storage connection additionally include:

- Changeover valve
- Control thermostat for domestic hot water (DHW)

Designation	Item No.	Leistung	Price (incl. VAT)
Kabola compact 7 heater with yellow-flame burner	56-001	7 kW	4.457,93 €
Kabola compact 7 heater with yellow-flame burner, including storage connection	56-002	7 kW	5.768,29 €
Kabola compact 7 combi boiler with yellow-flame burner, including plate heat exchanger	56-003	7 kW	6.686,90 €

## KABOLA B-Series

Do you want the same modern thermal comfort on board your vessel as at home? That's possible with KABOLA's B-series boilers! A range of oil-fired boilers specifically developed for ships, characterized by low maintenance requirements, reliability, compact dimensions, and excellent performance.

KABOLA B-series boilers are available with outputs from 23 kW to 116 kW, ensuring there is a suitable KABOLA boiler for every requirement.

If domestic hot water is needed, the boiler can be expanded with a boiler controller to operate an additional hot-water cylinder. It is also possible to connect an air-conditioning system based on the chiller principle.

KABOLA B-series boilers are supplied complete with installation materials such as a pre-filter, room thermostat, and circulation pump.

This allows the boilers to be installed quickly and easily. Another advantage of KABOLA boilers is that a vertical, roof-type flue is not strictly necessary. KABOLA has developed an exhaust system for these boilers that enables the discharge of combustion gases through the vessel's outer hull. All KABOLA boilers comply with CE standards and the high quality requirements of a modern industrial operation. KABOLA provides a five-year warranty against material or design defects and a one-year warranty on electrical and other components.

Designation	Art-Nr.	Price (incl. VAT)
Kabola B25	6-F005	6.612,60 €
Kabola B35	6-F007	7.727,08 €
Kabola B45	6-F009	8.206,65 €
Kabola B55	6-F011	9.962,80 €
Kabola B70	6-F013	12.691,60 €
Kabola B80	6-F024	13.637,22 €
Kabola B100	6-F025	15.433,90 €

### Scope of delivery:

- Yellow-flame burner
- Control panel
- Circulation pump
- Fuel filter
- Room thermostat

### Heaters with storage connection additionally include:

- Changeover valve
- Control thermostat for domestic hot water (DHW)

# Peripherals

## Room Thermostat

### SCHEER Room Thermostat incl. WLAN

- The SCHEER room thermostat allows you to control radiators, underfloor heating or fan heaters. The integrated battery saves the data even if the power supply is interrupted.
- It has a manual and an automatic mode in which individual time programs can be set for weekdays, Saturdays and Sundays.
- The thermostat is operated via the touch display or smartphone app. For this purpose, the thermostat can establish an internet connection via the existing WLAN interface. This means that the room temperature can also be called up and set remotely.
- A temperature sensor is integrated into the device to record the room temperature.
- An external sensor can also detect the temperature at a distance of up to 2.5 m.

#### Note:

- 12-50 V variants: The information that the external sensor is included in the scope of delivery can be found in the separate scope of delivery list.
- 230 V variant: The note "(included in the scope of delivery)" is already included in the description text directly next to the item on the external sensor.

Designation	Item No.	Price (incl. VAT)
12-50V (white)	0170107	272,68 €
12-50V (black)	0170108	272,68 €
230V	0170106	272,68 €

#### Included in delivery:

- Thermostat
- Ext. Sensor (2.5 Meter)
- Screws (2x)

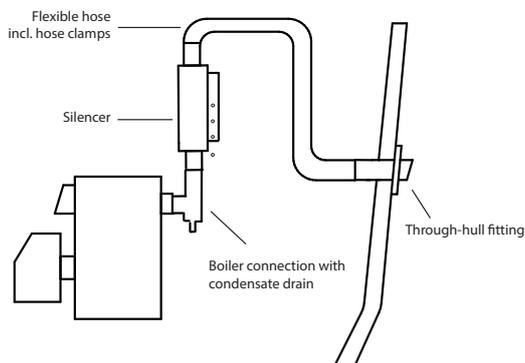

## Antifreeze

- 50% less CO<sub>2</sub> during glycol production
- Particularly environmentally friendly
- Bio-glycol from renewable raw materials
- Minimum frost protection: - 24 °C
- Temperature stability: max. +214 °C
- Ready-mix for long-term filling
- High-quality additives with 1.3 propanediol as antifreeze carrier
- Antifreeze base made 100% from plants (bio-glycol)
- Evaporation-proof, no crystallization
- Usable also for aluminum collectors
- Not hazardous, water hazard class WGK 1
- Free of nitrite, silicate, borate, phosphate and 2-ethylhexanoic acids

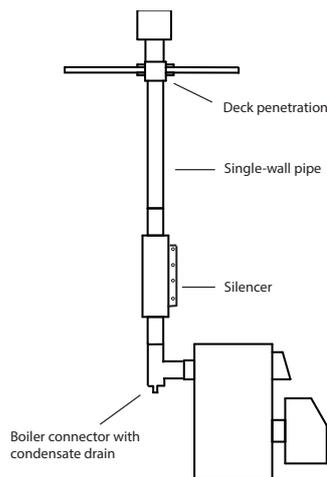

Designation	Item No.	Price (incl. VAT)
Ecological Antifreeze 1 Liter	190091	13,22 €
Ecological Antifreeze 20 Liters	190094	176,65 €

## Rotary switch

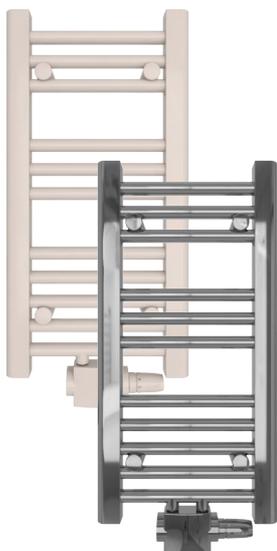

- Switching capacity: 20 A
- 4 positions,
- 3 speeds
- Use with plug 077522
- 30 A
- Ø 33 mm

Designation	Item No.	Price (incl. VAT)
Rotary switch, black, right-hand rotation	340.30.061	54,31 €
Compression fitting set for water-to-air heat exchangers	077523	28,57 €

Further models and accessories available on request.

## Towel dryer

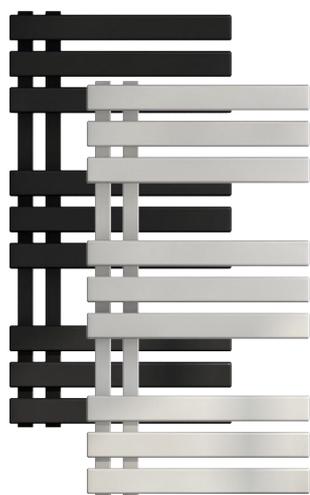

The SCHEER towel dryer is specially designed for use in bathrooms. Its high heat output and particularly compact installation dimensions make it ideal for motorhomes and caravans. The SCHEER towel dryer can also be used in pressurised and unpressurised systems.

- Efficient towel dryer
- Traditionally designed with a high heat output
- Special installation dimensions for usez
- Pipe spacing centre connection: 50mm, wall distance min./max. 60 / 90mm
- Including thermostat (valve tap block)
- Including wall brackets, blanking and vent plugs

Designation	Output	Item No.	Price (incl. VAT)
Towel dryer 300x600 mm white	198 Watt	001004	259,39 €
Towel dryer 300x800 mm white	270 Watt	001015	263,84 €

Towel dryer 500x700 mm chrome	192 Watt	001018	293,55 €

Other models and accessories are available on request

## Design Straight

The Design Straight bathroom radiators are an eye-catcher in your bathroom. The radiator gives your bathroom an elegant look. You can rotate this bathroom radiator by 180°, as the connection options at the top and bottom of the radiator allow installation in both directions. Suitable for use in pressurised and unpressurised systems.

- Exclusive towel dryer in SCHEER design
- Can be used flush right or left
- Elegant look in matt fine structure white or black
- High heat output
- Pipe spacing connection: 50mm, wall distance 80mm
- Including thermostat (valve tap block anthracite/white)
- Including wall brackets, blanking and vent plugs

Designation	Output	Item No.	Price (incl. VAT)
Design Straight 400x800 mm black	448 Watt	001019	510,49 €
Design Straight 400x800 mm white	448 Watt	001020	472,90 €

Other models and accessories are available on request

## Aluminium / copper convectors

The convectors heat the room air highly efficiently. The curved fins ensure the best heat transfer. The convectors are suitable for use in both unpressurised and pressurised systems.
